We hope that you find these resources valuable and thought-provoking. The June-21 edition of Cyber Brief covers everything new in various branches of cybersecurity.

Cybersecurity has a crucial role to play in securing global enterprises and their infrastructure. The modern global economy depends on cybersecurity. The role of the internet has expanded. Due to cybercrime, the annual global cost of cybersecurity rose to 4.2 billion in 2020. Even the most traditional industries in the world are now dependent on it. It's become a situation wherein compliance risk is a term that often ask us if network security certification...
