If you are, an online degree in cybersecurity can help you.

The industry is in dire need of cybersecurity talent. Are you prepared to make the most of this opportunity? Are you willing to expand your career options and dive into the cybersecurity industry?

Digitization has become part and parcel of industry operations and it's created new challenges. Conducting business in a data-driven world raises the stakes, leaving a company vulnerable as just one mistake can cause financial loss and lead to reputational damages.

The July-21 edition of Cyber Brief covers everything new in various branches of cybersecurity.
